

OFTEN COPIED / NEVER EQUALED™
SINCE 1958

The ultimate in durability, these units are designed for applications where multiple **M7, M9, C, D, & E** size cylinder transport, storage or manifolding is required. Individual spacing, positive cylinder placement and weight distribution allows for easy handling on uneven or irregular surfaces. The all-welded steel construction of angle iron and steel round bar insures greater durability and strength.

SOUND DEADENING KITS ***"Makes delivering cylinders completely invisible to the ears"***

Anthony has developed an exclusive sound deadening system for their multiple cylinder carts, used to distribute cylinders in and around hospitals, rest homes, convalescent homes etc. or where **QUIET** is essential.

These sound deadening kits include heavy-duty sound deadening matting & plastic bumper guards. This formula eliminates the rattling & clanging of steel & aluminum cylinders while in transport.
