

OFTEN COPIED / NEVER EQUALED™
SINCE 1958

NEWLY DEVELOPED and much needed **M4, M6 & B** stands are designed for multiple cyl. storage. The all-welded construction of heavy gauge materials insure greater durability and strength. Individual spacing, positive cyl. placement and weight distribution gives these units the right formula for safe storage.

Anthony has developed a unique cylinder protection system for its multiple cylinder carts, cylinder stands and racks. These newly designed plastic bumper guards (PATENT PENDING) help protect the surfaces of steel and aluminum cylinders from being scratched, gouged, scraped, or marred. These bumpers also eliminate the clanging noise when cylinders are in transport. **NOTE:** These retrofit bumper guards easily snap into place and **do not come off.**
